DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Sengupta et al (U.S. Patent 6,359,647).

Sengupta discloses a method of determining relative position and orientation of base and non-base camera, measuring a path of an object in coordinate frame (fig. 1, 6a, 6b, col. 4, lines 26-45, col. 9, lines 14-45), calculating transformation parameters based on object path (fig. 6a-6b, col. 2, lines 27-36), solve set of transformation equations (col. 6, lines 39-64), object overlap area (col. 7, lines 42-55), applying the transformation parameters from measurement (fig. 6a, fig. 1, block 140, 144, 142, lines 27-36), a path of a moving person around the scene (fig. 5a-5c).

Claim Objections

2. Claims 3-11 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all the limitation of the base claim and any intervening claims.

Allowable Subject Matter

3. Claims 12-18 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Independent claim 12 contains allowable subject matter. None of the prior art of record shows or fairly suggests the claimed invention.

Regarding independent claim 12:

The primary reason for the allowance of claim 12 is the inclusion of the method of measuring a relative pose between two cameras including selecting a time offset value corresponding to a time-shift between two cameras, calculating a transformation parameter using the time offset value, the transformation parameter capable of transforming parameter data in a coordinate frame of one of the two camera into a coordinate frame of the other of the two cameras so as to obtain the relative pose. It is these features found in the claim, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

Claims 13-18 are allowed due to their dependency on claim 12.

Art Unit: 2863

Regarding dependent claims 3-11 and 20:

The following is an examiner's statement of reasons for allowance: prior art fail to teach the use of the transformation equations parameter as data points matching time value with the least amount of error, the use of least square solution and median of square solutions, unsynchronized data, time offset value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
